Ranjelison Vonjitahina Charles

Software Engineer/Python Developer · AI / Machine Learning

Anosy, Antananarivo | +261 34 11 517 76 | vonjitahinaranjelison@gmail.com | LinkedIn

PROFILE

Backend Python developer and software engineer with over 5 years of experience in API design, database design, and cloud deployment, holding a Master's degree in Big Data & AI (ESTIA). I designed and maintained a backend planning system in production for a transportation and tourism company, incorporating machine learning components. I am self-sufficient when working remotely and experienced with Agile teams.

KEY SKILLS

- Backend : Python, FastAPI, Django, Flask, API RESTful
- Database : PostgreSQL, MySQL, MongoDB
- IA / Data : scikit-learn, TensorFlow, PyTorch, NLP, LLM, Pandas, NumPy, RAG
- Cloud / DevOps : Docker, Git, AWS (EC2, RDS, S3)
- Quality & Methods : Agile/Scrum, Jira, code reviews, technical documentation, pytest, unit and integration tests
- Front : JavaScript, Angular

PROFESSIONAL EXPERIENCE

Software Engineer/Python Developer, Mautourco (Mauritius) | [Since April 2023]
+3 years on-site and remote work (Collaboration with BICI)

Tourism Services and Transportation

- Designed and deployed a production-ready backend system for trip planning and fleet management, automating 85% of organizational operations.
- Developed the FastAPI/Django APIs for a mobile app for drivers (trips, field reports, real-time communication with the back office) used by hundreds of drivers.
- Integrated a machine learning model to anticipate demand and optimize vehicle allocation, with an MAE of 2.39 vehicles relative to forecasts.
- Implemented real-time vehicle tracking to improve logistics efficiency.
- Led the migration of a Java JSP back-office system to Python: modernized architecture, improved maintainability, and easier integration with new services.
- Managed deployment and monitoring on AWS (EC2, RDS, S3) using Docker, ensuring stability and performance.
- Gathered requirements from clients, validated business rules, and recommended technical solutions.

Stack : Python, FastAPI, Django, PostgreSQL, Docker, AWS, scikit-learn, Git, Jira

Python Developer, BICI (Madagascar) | [March 2022 – March 2023] | 1 year | on-site

IT Services / IT Consulting

- Developed and maintained REST APIs for client software, ensuring seamless integration.
- Fixed production issues to improve system reliability.
- Administered and optimized databases (PostgreSQL, MySQL) to speed up data access.

Stack : Python, Django, FastAPI, PostgreSQL, MySQL, Git

Full-Stack Developer | Numerika Center | [March 2021 - March 2022] | 1 year
Vocational Training Center

- Designed, developed, and deployed APIs for a web-based business management and professional training platform

Stack : PHP, Laravel, JavaScript, MySQL, Git

FORMATIONS

- **Master of Science in Big Data & AI (BIHAR), ESTIA Institute of Technology, France | 2024**
  Big Data architectures, AI model deployment, NLP, computer vision
- **Bachelor's Degree in Web Computing and Design, IT University, Madagascar | 2021**

LANGUAGES

- Malagasy: Native language
- French: Advanced
- English: Intermediate
